

EasyScreen

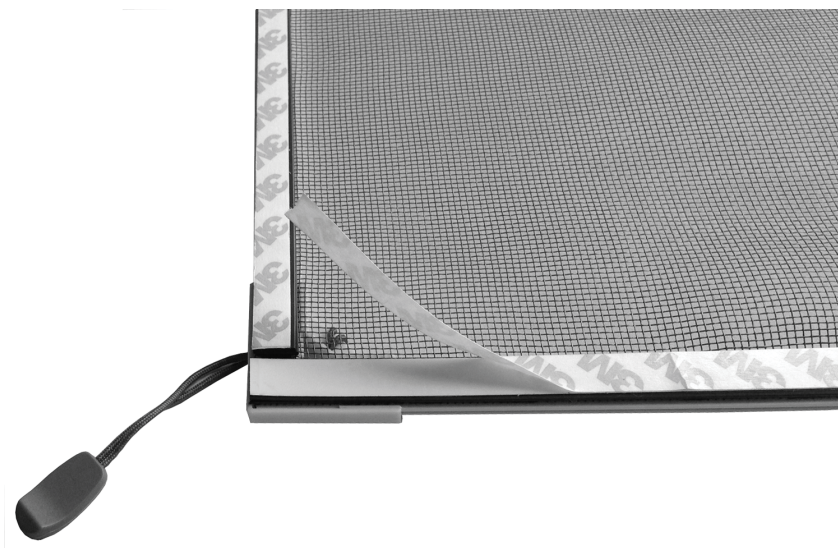

Installation Instructions

Please read the following installation and operating instructions carefully. We are unable to accept responsibility for products that have not been installed or operated correctly.

Dust your window frame before installation.

Step 1 . Peel The Adhesive Tape

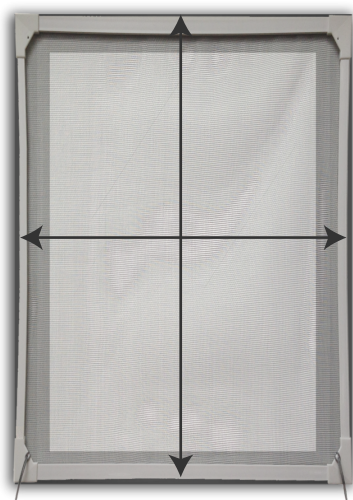

Peel the tape to expose adhesive for all four sides of the screen.

Step 2: Placing The Screen On The Window Frame

- Make sure the position where you placing the screen is the same where the measurements were taken.
- As you place the screen on the window frame make sure the edge of the pvc frame lines up with the window frame.

Starting from the top as you attach the screen onto the window frame push the sides of the screen to line up.

Bowed Frame

After correct positioning
